PROCEEDINGS OF THE CLUB.

The Annual Meeting of the Cambridge Entomological Club was held in the Council room of the Boston Society of Natural History on the evening of January 19, 1904; President Morse in the chair; 17 members present. The record of the last meeting was read and accepted. Mr. Field presented a final report on the finances of the Harris Club. On motion of Mr. Newcomb it was voted to sell the library of the Harris Club at auction at the next meeting. The report of the Secretary for the year just closed was read and accepted. The report of the Treasurer was read, and the Chair appointed Messrs. Bolster and Bowditch to act as auditors. Mr. Samuel H. Scudder was unanimously elected to Life Membership in the Club. Mr. Hayward called attention to the fact that the Club's age was just thirty years and ten days, the first meeting having been held January 9, 1874.

The report of the nominating committee was presented and accepted, and the Club voted to instruct the Secretary to cast one ballot for the entire ticket. The officers thus chosen for the ensuing year are: President, J. H. Emerton; Secretary, W. L. W. Field; Treasurer, Roland Hayward; Members at large of Executive Committee, P. G. Bolster, H. H. Newcomb.

The announcement was made that hereafter until further action of the Club in the matter of the annual assessment of active members, each active member not in arrears should be entitled to receive *PSYCHE* regularly, and be reckoned a paid-up subscriber to that journal.

Mr. W. L. W. Field then exhibited specimens of *Basilarchia proserpina*, *B. arthechippus*, and other puzzling forms in the same genus, and called attention to the need of further study of these butterflies. Mr. H. H. Newcomb followed with a very interesting talk on *B. proserpina*, in the course of which he showed some unusual specimens.

It was agreed that a special meeting should be held on the evening of February 2. Adjournment was reached at 9.35.

A special meeting of the Club was held in the Council room on the evening of February 2, 1904. Ten members were present. The President being late, Mr. Morse was elected temporary Chairman. The record of the last meeting was read and accepted.

Mr. Newcomb showed some Mt. Washington material received from Mrs. Slosson, and also a series of specimens which he had prepared for the New England collection of the Boston Society of Natural History. Mr. Field showed a series of *Basilarchia arthemis* from Alstead, N. H., and a specimen of the same species from Milton, Mass. Mr. Morse showed a fine series of *arthemis* and *proserpina*, arranged in a case of the kind invented by himself, and described in the Journal of the N. Y. Entomological Society, vol. IV., p. 20. Mr. Newcomb read a letter from Dr. Seifert, setting forth the writer's views on the relationship of *Basilarchia proserpina* to *astyanax* and *arthemis*.

The books formerly belonging to the Harris Club were sold at auction by Mr. Newcomb.

The meeting was then adjourned.

The 234th regular meeting was held in the Council Room of the Boston Society of Natural History on the evening of February 16, 1904. Eight members present. In the absence of the President Mr. Johnson was appointed Chairman.

The record of the last meeting was read and approved. Mr. F. H. Foster of Claremont, N. H., was unanimously elected to Associate membership. Mr. Morse then gave a most interesting account of his recent collecting trip through the southeastern states. Discussion followed, after which the meeting was adjourned.

W. L. W. FIELD,
Secretary.
